

INTERNATIONAL ASSOCIATION OF EDUCATORS AND RESEARCHERS
Accelerating Education through Excellence in Research

Annals of Networking and Communications Engineering (ANCE)

Dear Authors

It is our great pleasure to introduce [IAER's](#) newly formed journal: [Annals of Networking and Communications Engineering \(ANCE\)](#), a scholarly peer-reviewed open access international research journal enabling low cost publication solutions while projecting an image of quality research. ANCE is published by the [International Association for Educators and Researchers \(IAER\)](#) which is a CIC (Community Interest Company) i.e. a low-profit organization, registered in England and Wales.

As an Open Access journal, ANCE aims to provide a channel for quality research to be publicized to a broad audience. Past issues of ANCE will be made available online at ANCE website and archived at the [British Library](#), London, UK.

Printed format of the journal issues will be printed and distributed by Marston Book Services, a printer in Oxfordshire, UK. The Article Processing Fee (APF) also includes two copies of the printed issues of the journal, to be posted to the mailing address of the corresponding author FREE of any additional cost.

AETiC welcomes authors to submit, by email (ance@theiaer.org) using [ANCE's MS Word Template](#), their original research, review and survey papers which significantly contributes to the existing domain of research and adds new knowledge in the field of emerging technologies related to computing, software engineering, information technology and communications engineering.

Submission deadline for the first issue is November 30, 2017.

If you have any further queries, please feel free to let us know.

We look forward to receiving your contributions.

Regards

ANCE — Editorial Office
